

CISTUS NURSERY is a retail micro-nursery on Sauvie Island in the Columbia River near Portland, Oregon. We specialize in Mediterranean, Southern hemisphere and Laurasian area plants that thrive in the Northern Willamette Valley. We also grow a range of hardy tropicals. We are also the site of Ned Jaquith's THE BAMBOO GARDEN Retail Nursery.

We are excited that Ned Jaquith's Bamboo Garden will be doing its retail at our nursery in the coming year. Please visit on weekends when Ned or one of his staff is here to answer all your bamboo questions. For descriptions of his bamboo selections, visit www.bamboogarden.com

Cistus Nursery propagates (by cuttings, seed or divisions) about 95% of the plants we sell. The others we obtain from local specialist growers, import from foreign nurseries or have produced through tissue culture. Plants marked with a Plant Patent number are purchased as liners from licensed propagators.

Nomenclature for this list follows the 2003-2004 RHS Plant Finder, Griffith's Index of Garden Plants, local floras, collectors' lists and current literature. Please let us know if you have a more correct name for any of our plants.

Collectors' numbers, accession numbers and sources often follow the Latin names in the list and should be kept with the plant

when distributed or propagated whenever possible.

Cistus Nursery is open from 10am to 5pm Wednesday through Sunday eleven months of the year. We close early December to late January when many of our staff flee to the Southern Hemisphere to collect.

You may reach us on the phone most days.
